

*DELA-NOBA: Developing the Language Awareness Approach in the Nordic and Baltic Countries*

The objective of this three year Nordplus Horizontal project is to disseminate and exchange results and experiences in education by examining how the Language Awareness approach can be integrated and further developed in the Nordic/Baltic context.

The project activities involve 21 partners from seven participating Nordic/Baltic countries (Denmark, Estonia, Finland, Iceland, Latvia, Lithuania, and Sweden) and establish partnerships between universities and schools (primary and secondary schools) in these countries.

In the school year 2013/2014, we will evaluate existing teaching materials in respect to the Nordic/Baltic context. The pupils will work with a language autobiography and three teaching activities. Parents will be asked to complete short questionnaires about language knowledge and use.

All information will be anonymous. You and your child can withdraw from the research project at any time without consequence.

Please return this to the teacher!
